

Roxtract Water

Negative Electron in Roxtract Solution

This is the only time we get somewhat scientific.

Roxtract Solution contains negative electron that excites the O part of H₂O. It helps activate the oxygen in the water. And the result is? You won't believe this.

It creates radical oxygen or free radicals. Don't jump into a conclusion because you heard that industry is telling us that free radicals are bad for our health. According

to the discoverer of the Roxtract Solution, Free Radicals are the reason we are alive!!! So let's examine what they do to us.

When the oxygen in the water is radicalized, it creates a process of cleaning itself in perpetuity. In other words, Roxtract gives you radicalized oxygen in your body. More oxygen working for you, the better the result is. Remember we cannot live without oxygen. So how come some people are saying that oxygen is bad for you? Because it suits their business; that's why. These people are promoting sweet drinks like Xango juice, Noni Juice and the likes to promote the concept of antioxidant. In other words they are promoting product that suppresses the activity of oxygen in our body! Excuse me but the oxygen repression cannot be good for our health. Now there are two kinds of bacteria that we must know that live in our body. One type is called aerobic bacteria and the other anaerobic bacteria. The latter is the kind that cannot live in an oxygen rich environment. So they die because there are too much oxygen activities in our body because of Roxtract. Cancer cells cannot live in an oxygen rich environment. I wonder what would happen to them. I will leave that up to your imagination, because we cannot tell people about health if something that is not a drug does something like curing, according to the FDA.

Once you create Roxtract water using our system, this water becomes literally free from rotting, because all the visible and invisible organic matters trapped in the clusters of water are completely removed. This water then becomes something that lasts till the end of this world

without **ROTTING EVER!** Yes, this can be stored for eternity!!!! (People! Water never rots; only organic matters, visible or invisible, are the ones that go bad and eventually make the water stink.) You need proof?

I have an interesting proof I get to see every night with my own eyes. I have the same Roxtract water I drink in my own hot tub. (It's like a Jacuzzi.) I use the same water again and again and again for up to 12 months **WITHOUT** using harmful chlorine or other manufacturer recommended poison! I don't do anything to this water. This water maintains itself up to 8 months or longer, (my current water is 12 months old. And I am experimenting with it before I market this to the world.) It always remains crystal clear. I can put a book at the bottom of my hot tub and read it from the top of the water. At the end of the 8th month or 12th month, I give it to plants and vegetables. They get the perfect 'organic' minerals and so I have a perfect organic garden. You can give this water to grass. Then we discovered that weeds like crab grass don't grow there. Mushrooms cannot grow there either. (Mushrooms are fungi and they cannot grow in mineral rich environment.)

This Roxtract water also vibrates at the frequency of 10,000 cycles per second!!!! Enzymes in our body, of where there are about 40,000 according to scientists, also vibrate at the ratio of 10,000 cycles per second. We do know that enzymes cannot function without combining with minerals, which work as catalysts or igniters.

When we say "our minerals are kept ionized in acid sulfate", by ionized we mean that this water is bio-electrically charged. Our body organs carry their own bio electrical frequency.

In other words, the Roxtract water is live water. This is why we call our water 'living water.'
